## Corporate Overview

JX Nippon Mining & Metals, formerly Nikko Metals, is a recognized leader in the field of high purity metals and wafers used in the microelectronics and communications industries.

JX Nippon Mining & Metals offers a wide variety of sputtering targets for demanding thin film applications including semiconductor, data storage, and optical films. Our InP and CdTe wafers are widely used for compound semiconductor and IR sensor applications.

JX Nippon Mining & Metals is well-known for delivering high quality electronic materials that meet and exceed the expectations of our customers and is consistently acknowledged as a top supplier.
